

## Year 4 Week Commencing 6<sup>th</sup> July Maths

Hi everyone,

I hope you're all well, and have had a lovely weekend? Here is the link to the White Rose website for this week's learning clips:

<https://whiterosemaths.com/homelearning/year-4/>

Here is the link to our school website, and the Year 4 page, where you can get the activities and answers (they will still be emailed out to you as well):

<https://www.ivingswoodacademy.org/page/?title=Year+4&pid=100>

This week we will begin looking at recognising and understanding angles and identifying properties of 2D shapes:

1. Monday - Identify angles
2. Tuesday - Compare and order angles
3. Wednesday - Triangles
4. Thursday - Quadrilaterals
5. Friday - maths challenge!

Remember to **watch the videos first** as they will show you how to solve the sorts of problems in the tasks. There is a lot to remember, so I have sent out a support sheet that has all the information about angles and shapes on it that you can use to help you through the week.

If you find this tricky, please don't worry - you know that I will make sure to go over all this with you when we are eventually back at school, and I'm sure it will be fine. Good luck - and remember to have fun! 😊

Miss Smith
