

Think together

- 1 Write each decimal as a fraction. The first has been done for you.

$$0.1 = \frac{1}{10}$$

$$0.25 = \frac{\boxed{}}{\boxed{}}$$

$$0.6 = \frac{\boxed{}}{\boxed{}}$$

$$0.85 = \frac{\boxed{}}{\boxed{}}$$

$$0.92 = \frac{92}{100}$$

$$0.95 = \frac{\boxed{}}{\boxed{}}$$

$$0.975 = \frac{\boxed{}}{\boxed{}}$$

- 2 Write each of these decimals as an improper fraction and as a mixed number.

2.3	
2	0.3

0	•	Tth	Hth
2	•	5	3

CHALLENGE

3 a) Complete the simplifications.

To simplify a fraction, you need to find a common factor of the numerator and the denominator.

$$0.2 \longrightarrow \frac{2}{10} \longrightarrow \frac{1}{5}$$

$$1.2 \longrightarrow \frac{12}{10} \longrightarrow \frac{\square}{\square}$$

$$0.4 \longrightarrow \frac{4}{10} \longrightarrow \frac{\square}{\square}$$

$$1.4 \longrightarrow \frac{\square}{\square} \longrightarrow \frac{\square}{\square}$$

$$0.6 \longrightarrow \frac{\square}{\square} \longrightarrow \frac{\square}{\square}$$

$$1.6 \longrightarrow \frac{\square}{\square} \longrightarrow \frac{\square}{\square}$$

$$0.8 \longrightarrow \frac{\square}{\square} \longrightarrow \frac{\square}{\square}$$

$$1.8 \longrightarrow \frac{\square}{\square} \longrightarrow \frac{\square}{\square}$$

b) Convert these decimals into fractions and simplify them as far as you can.

0.25 0.125 0.875 0.35 0.95
