

Think together

1 What is Lexi's number?

Multiply your number by 3 and add 4.

Lee

My answer is 19.

Lexi

$$\begin{array}{rcl}
 3x + \square & = & \square \\
 - \square & & - \square \\
 3x & = & \square \\
 \div \square & & \div \square \\
 x & = & \square
 \end{array}$$

x	x	x	4
19			

2 Solve the following equations.

a) $5m + 3 = 58$

b) $17 = 2q + 5$

m	m	m	m	m	3
58					

CHALLENGE

- 3 a) A kettle has a capacity of 600 ml.

Richard fills 3 cups from the kettle.

He has 30 ml left over.

What is the capacity of 1 cup?

Use a for the capacity of the cup.

$$\boxed{} a \text{ } \bigcirc \text{ } \boxed{} = 600 \text{ ml}$$

$$3a = \boxed{}$$

$$a = \boxed{}$$

- b) Solve the following equations.

i) $3a - 20 = 16$

ii) $20 = 2p + 8$

iii) $4c - 6 = 14$

iv) $2p + 8 = 21$

I will draw different bar models to represent the equations.
