

Wednesday 3rd June Science

We are going to attempt another experiment, but only if you can and your grown up says yes.

Today I want you to find 4 things that you think will freeze well, do not use water again. You need to put them into the freezer and fill out the table below. I have filled out the first line as an example

What I have frozen	My prediction of if it will freeze or not	Did it freeze or not
Water	Yes	Yes
