

Wednesday 24th June - Science

<https://www.bbc.co.uk/bitesize/articles/zh48d6f>

This week we are not going to do any experiments but we are going to learn about different materials. We did do a little bit about this in school. Do the activities and then see how many different materials you can find around your house. If you are going for a walk see what different materials you can see as you walk around. Perhaps your grown up will let you bring some things home and you can make a material collection.
