

Hello Year 2.

Today you will be sent your science and topic activities as well. For science this term we are learning about how we can use different materials. If you are enjoying this there are some more ideas at this website.

<https://www.science-sparks.com/materials-ks1/>

Materials and their properties		
Metals  Strong Shiny Good electrical conductors The scissors are made from metal. 	Plastics Transparent?  Waterproof Strong Plastic can be used to make toys, bags and bottles. 	Glass Transparent Thick glass = strong  Windows and glasses are made from glass. 
Wood Strong  The picnic table is made from wood.	Fabrics Absorbent  Flexible Good Heat Insulator  Fabrics can be used to make clothes. 	Which is the strongest?   Which is a good heat insulator?   Can name some materials that are magnetic?

For maths we are continuing with multiplication activities this week.

Here is the link for maths this week <https://vimeo.com/417922431>

English Activity

Today I would like you to continue writing the story today, if you have already done this then use the story map to make sure you have covered everything from the story, if you have missed anything don't worry, you can add it in using ^ and writing above where you want to add the new words.

Tomorrow and Friday we will be completing our editing.
