

Tuesday 9<sup>th</sup> June 2020

Can you believe that Captain Scott and his team set off for their adventure 110 years ago! So much has changed in that time but it would still be challenging to travel to the South Pole on foot because even if we have better clothes, shelter and food, we do not know what the weather will do and how cold it could become. I think that there are some amazing people in our history and even now that are trying to find out information because we don't know everything.

Thank you to Daisy for sending photos of you making your sandwich, has anyone else had a go at doing this? If you want to email photos to the office, they send them to me.

## Maths

We are continuing with fractions today. Again, just look at the first page and have a go. If it is too tricky and you cannot remember how to do fractions have a go at your number bonds to 10 and 20 or your times tables.

Here is the link for the video today.

## English

Today I would like you to use the video information, the sequencing activity yesterday and any other information that you have found out, to make a game about travelling to the South Pole or you could create a timeline of events. If you are making a game, you could use a map like the one below. Remember if you are making a timeline you start with the oldest date - the thing that happened first.
