

Year 2 Science

Weeks commencing Monday 8th June 2020 and Monday 15th June 2020

For Science this week and next week we are going to be completing a problem-solving activity, using the knowledge you have built up this term about materials.

The challenge is to design a doll/toy house for a toy company. In order to make children want to buy it, you need to decide what sort of toys/dolls will live in it, what the design of it will be and the materials needed to make it. Would metal be a good material to make curtains from?

If you have a box you may also have a go at making a model of it, much like we did with our museums at the end of Spring Term.

Here are some images of houses to help you get inspired.
