

Hello Year 2,

I hope you have been able to enjoy the nicer weather this week. Every time the weather gets better, I end up having to weed the garden again, they seem to grow much faster than other plants!

### Maths

Today you are continuing with the measuring, we are now moving onto mass, can you remember how we talked about the difference between weight and mass? Our mass stays the same even when we are in space but our weight changes because on the moon we are weightless!

Here is the link for the video today.

### English

Today we are going to continue to write instructions.

#### **Equipment**

Hopscotch squares

A small stone for each player

1. Stand next to the number one on the hopscotch
2. Throw a stone onto a number
3. Jump on the numbers, starting with one
4. Stop when you get to your stone's number
5. Pick up the stone
6. Keep jumping on the numbers until you get to the end
7. Turn around and jump back to the start
