

Hello Year 2,

It is a happy and sad day today, I am happy that we can have a break now and try to enjoy some time with friends and family. I am looking forward to seeing my family, who I have not seen since Christmas but feel a bit sad that I won't be able to hug them yet. I am also sad to not be able to have seen you all and be sending you all off to Year Three but will be pleased to see most of you again in September.

We still have not wished everyone a happy birthday so we hope that Noor, Sheema, Jack, Billy, Oscar and Maya.W. have a wonderful day in July and August when they celebrate their special day of becoming 7!

Have a wonderful summer and let's try and get 100% attendance so no other classes can win it!

Maths

Over the summer I would like you to really work hard on getting to know your number bonds to ten and twenty without having to count each time. As you know there are many different ways to complete our number bonds, the important thing is to remember which ones go together so if 1 and 9 go together to make 10 then what goes with 1 to make 20? Here are some games you could try to improve your knowledge.

English

Today I would like you to do two things, the first is to create some more pages, this could be factfiles, information sheets or labelled illustrations.

The second thing is to create a contents page for your project, we have made these before, but here is an example to help you, remember you need to number your pages first.

Contents	
What a Difference!	4
Where Mammals Live	6
Catching a Meal	8
Hot and Cold	12
Getting Around	16
Mammal Young	20
Mammal Pets	24
Unusual Mammals	26
Mammals to Scale	28
Glossary	30
Finding Out More	31
Index	32

Contents	
3	All kinds of sharks
4	What is a shark?
6	Gill power
8	Super senses
10	Types of teeth
12	Attack!
14	Different disguises
16	Baby sharks
18	Across the oceans
20	Sharks of the deep
22	Gentle giants
24	Great white terror
26	Strange sharks
28	Sharks in danger
30	Glossary of shark words

All kinds of sharks

There are more than 400 different types of sharks. Some are as big as a bus and some are as small as this book.

This tiger shark is twice as big as a grown man.
