Monday 15th June

I hope you managed to have a good weekend. We went on a bike ride over to Rickmansworth Lido; it was fun and tiring! What ever you did, you can tell me about it on our weekly phone call.

English

Today we are learning about synonyms and antonyms. You already know that synonyms are words that have the same meaning but have different strength such a big, hug, colossal, massive, gigantic. Antonyms are opposites. For example: the antonym of big is small, the antonym of tall is shirt.

Follow the BBC bitesize link to find the learning clip and suggested activities.

Maths

Today we are revising how to calculate perimeter. Perimeter is the distance around the outside of a shape. To calculate perimeter, you must add up all the lengths of the sides. Be careful you add up all the sides. What do you do if you do not know all the lengths of the shape? You need to use your knowledge of shapes. For example: the opposite sides of a rectangle are the same and all sides of a square are the same. Your task is to calculate the perimeters of the shapes on the next page. Good luck.

Other activities

- Design a new building for Chesham. What will it be used for? What does our town need? Who will use the building? I am excited to see what ideas you come up with. Remember you can send me a picture of the finished article.
- TTRS
- Play a board game together. I am good at Cluedo and Pop-Up Pirate. Which games do you enjoy?
