

Monday 20th April 2020

Hi everyone, I hope you had a lovely Easter 'holiday' and enjoyed some more free time with your family at home, perhaps having a go at some of the Easter challenge activities we sent out? Today is officially the first day of the Summer Term, so I have got some new maths and English activities which will be sent out daily to you by email and also shared on our website. I hope you're ready and excited to start our new learning!

Maths

Our school follows a scheme called White Rose Maths, which sets out how we teach all the maths topics we are meant to cover over the year. They have set up a really helpful home learning section on their website, with a page for each year group and special daily tasks. There is a video clip which talks you through each day's 'lesson' that you should watch before attempting the task, then there is an activity sheet, and an answer sheet to look at to check your answers. The link for this week's learning is here:

<https://whiterosemaths.com/homelearning/year-4/>

There are 5 lessons: 1 Make a Whole, 2 Write Decimals, 3 Compare Decimals, 4 Order Decimals, 5 Friday Challenge! The first video clip links back to a previous lesson that they set before the Easter holidays, when I hadn't set you this work, so don't worry too much about that first introductory minute or two.

Please work through these at your own pace, and certainly no more than 1 lesson per day! I will download the activity sheets and answer sheets and put these on the website for you, but if you have any trouble accessing or viewing these, you can get them yourself from the website.

I hope the videos are helpful, and that the work isn't too tricky for you. I will be ringing you all again this week, and again weekly from now on, so if there is anything you struggle with, want to ask or check, please let me know.

Looking forward to speaking to you soon!

Miss Smith.
