

## Year 4 Week Commencing 18<sup>th</sup> May Maths

Hi everyone,

I've made this one document to help you with all your maths for this week. We are still using the White Rose Maths website, which has lesson videos for each day up there to watch. Just as last week, you can't download the activities or answers from the website directly anymore because they are restricting access, but I can get them, so I will make sure they are emailed out to you each day and that they're up on our school website as well, so you can download them from there if that's easier.

Here is the link to the White Rose website for this week's learning clips:

<https://whiterosemaths.com/homelearning/year-4/>

Here is the link to our school website, and the Year 4 page, where you can get the activities and answers (they will still be emailed out to you as well):

<https://www.ivingswoodacademy.org/page/?title=Year+4&pid=100>

This week we will be going back over our understanding of fractions. We have worked really hard on this already, but going back over it to revise it is really important too because it means we will fix this understanding in our brains really well!

1. Monday - recognise tenths and hundredths
2. Tuesday - equivalent fractions 1
3. Wednesday - equivalent fractions 2
4. Thursday - fractions greater than 1
5. Friday - maths challenge!

Remember to **watch the videos first** as they will show you how to solve the sorts of problems in the tasks. I have downloaded a fractions wall for you to use to help with the problems - remember we used these in class to help our learning! When dealing with fractions greater than one, try drawing your own fraction numberline to help you count up above 1 and through other whole numbers in fraction amounts.

Have a go and try your best, if you get a bit stuck or are confused don't worry, there is lots you can do. Look at the videos again and ask an adult or older brother or sister for help. I will be calling you all again this week and will be happy to talk you through any problems you might have. If, after all that, you're still finding it tricky, please don't worry - you know that I will make sure to go over all this with you when we are eventually back at school, and I'm sure it will be fine. Good luck! 😊

Miss Smith
